Objective:

Complexity is your enemy. Any fool can make something complicated. It is hard to make something simple. My objective is to make things simple.

Education

**Garrison Post Graduate College, Lahore affiliated with
University of Engineering and Technology, Lahore, Pakistan**
B.Sc. (Hons.) Computer Science
3.811 CGPA out of 4.0

Graduated
August 2012

Employment History:

iCarasia Kuala Lumpur, Malaysia
Software Engineer *August 2015 - Present*

I hired as a Mobile Developer. I migrated our code base from Eclipse to Android Studio. I managed our source code as a single source for three countries. I proposed TDD. I migrated application Architecture to MVP after convincing management. I started Unit and Functional Tests. I implemented CI but that is not the part of our deployment pipeline. Later Lead Engineer and Project Manager gave resign. I manage our releases alone. I worked on Dealer Application, later management outsourced due to lack of resources. I implemented Chat feature by using third party SDK, complete solution is managed by me later that implemented in our all platforms and currently that is working successfully. I did interviews to hire Technical Lead and Software Engineers. Dealer Application code quality is not good so management decided I will shift to Dealer Application. I proposed a blue print of application, which is accepted by Lead Engineer. Now I am managing remote team and trying to revamp product modules. I convince my QA to start writing automation tests. I work with Design Team and we finalize style guideline for our Android applications. I gave sessions on Android Development to my colleagues.

VentureDive Lahore, Punjab, Pakistan
Senior Software Engineer *February 2015 - May 2015*

I started working on a Athan Pro Application after one month management decided to shift me in other project called Careem. I work on this project, I implemented some UI's and features but later I gave a resign on completion of my probation period.

Agnitus Islamabad, Pakistan
Android Technical Lead *January 2014 – December 2014*

I started as a Technical Lead with 2 more team members. Here I managed my team and work on our product called Agnitus. I mostly work on performance and my team member's skill. I proposed an architecture for Android app which is accepted by CTO but never got time to implement due to lot of reasons. Later I work on many new features of this Application. I also closely work with our game development team because this application database and reporting is developed in Android native but all games are developed in unity. I write plugins for communication between Android native and Unity3D engine.

Wemo Tech Lahore, Punjab, Pakistan
Mobile Software Engineer *April 2013 – December 2013*

I started working here as a solo developer. I work very closely with Project Manager. Here I worked on lot of products which are available at that time on Google play store. I managed the complete life cycle of the products from start to deployment on play store. I proposed good practices to QA and Designers for Android. I also got a chance to create a one framework for Android apps. So our all new Android apps are dependent on that framework.

MobilezApp Lahore, Punjab, Pakistan
Senior Software Developer *February 2013 – March 2013*

They hired me from Odesk. When I joined these guys they have no proper existence in our country. So I leave these guys in probation period.

Cognitiv Labs Lahore, Punjab, Pakistan
Android Developer *July 2012 – February 2013*

I started my job here as a solo developer. I worked here on a lot of projects and products. Later I got a chance to hire more Android developers. I worked with them and helped them. I managed team members in perspective of software engineering. I gave solutions to them when they are blocked with parallel working on my products. I gave sessions on Android Development.

Binary Tech Lahore, Punjab, Pakistan
Jr Software Engineer *October 2011 – February 2012*

Here I worked as a part time employee during my studies. First I start working on CakePHP later I showed my personal products on Android platform to my Lead. So he decided to move me from Web team to Mobile team. I start working with mobile team on cross platform Sencha Touch. Later I gave a resign because I am not able to give my 100% focus on my studies.

Odesk.com *January 2011 – January 2013*
Android Freelancer

In my university days. I started a freelancing on Odesk.com. I did a lot of projects on Odesk but later I stop myself from more freelance work.

Professional Skills:

Object Oriented Programming, Functional Programming, Design Patterns, Data Structures, SOLID Principles, Mobile Applications Architecture, Design and Development, Clean Coding, Working with legacy code.

Android (SDK), SQLite, Realm, Concurrent Programming, Kotlin, RxJava, Dagger2, Unit Testing, Functional Tests, Sonar.

Cross platform Mobile Apps using Flash CS5.5, Sencha Touch 1.0 - 2.0 , Phonegap , JQuery Mobile.

Jenkins, Bamboo, Git , SVN.

Assembly, C , C++ , Java (SE), ActionScript 3.0, HTML, HTML5, CSS, JavaScript, JQuery, PHP, Python, Flash, MYSQL, Oracle, SQLite, Embedded Programming of micro controller 8051, Unity3d.
